# "DOP-TELL-IT" TO LIFT!

Learn more  
about the  
lift at  
[Doptelet.com](http://Doptelet.com)

**Doptelet can help you  
reach 50K platelets in  
as few as 8 days.**

**JUST ASK YOUR DOCTOR!**

**In a 6-month clinical trial, Doptelet was shown to:**

**8**

Lift platelet counts in  
as few as 8 days...

**50**

keep them lifted  
at 50K platelets per  
microliter or higher...

**12**

for an average of  
12 total weeks!

Adult patients, like you, were studied while taking Doptelet for 6 months.  
On day 8, around 66% of patients on Doptelet reached their treatment goal.

Brief Summary.**

## **What is DOPTELET® (avatrombopag) [dop-TEL-et]?**

DOPTELET is a prescription medicine used to treat low blood platelet counts in adults with chronic immune thrombocytopenia (ITP) when other treatments have not worked well enough.

Doptelet is used to help raise platelet counts in adults with chronic ITP, but it is not used to make platelet counts normal in these patients. It is not known if DOPTELET is safe and effective in children.

## **IMPORTANT SAFETY INFORMATION**

### **Before taking DOPTELET, tell your healthcare provider about all your medical conditions, including if you:**

- have ever had a blood clot.
- are pregnant or plan to become pregnant. DOPTELET may harm your unborn baby. Tell your healthcare provider if you become pregnant or think you may be pregnant during treatment with DOPTELET.
- are breastfeeding or plan to breastfeed. It is not known if DOPTELET passes into your breast milk. Do not breastfeed during your treatment with DOPTELET and for at least 2 weeks after the last dose. Talk to your healthcare provider about the best way to feed your baby during this time.

**Tell your healthcare provider about all of the medicines you take,** including prescription and over-the-counter medicines, vitamins, and herbal supplements. DOPTELET may affect the way other medicines work, and other medicines may affect the way DOPTELET works.

## **What are the possible side effects of DOPTELET?**

### **DOPTELET may cause serious side effects, including blood clots.**

People with chronic immune thrombocytopenia and people with certain blood clotting conditions may have increased risk of developing blood clots. Tell your healthcare provider right away if you have signs and symptoms of a blood clot, including:

- swelling, pain, or tenderness in your legs
- shortness of breath
- chest pain
- fast heartbeat
- stomach (abdominal) pain or tenderness

### **The most common side effects of DOPTELET when used to treat low blood platelet counts in adults with chronic immune thrombocytopenia (ITP) are:**

- headache
- tiredness
- upper respiratory tract infection
- joint pain
- bleeding gums
- bruising
- nosebleed
- purple or red spots on your skin
- runny nose

These are not all the possible side effects of DOPTELET. Call your doctor for medical advice about side effects. You are encouraged to report side effects to FDA at 1-800-FDA-1088.

**For further information, please see Brief Summary of Patient Information.**

# DOPTELET ANYTIME, ANYWHERE

**Based on your chosen schedule!**

Doptelet is not a  
steroid — it also means  
no weekly injections and  
no limits on iron-rich  
foods and dairy.  
#FoodRequired

Unlike other treatments, **Doptelet can be taken with any kind of food** to lift your platelet count no matter where you are—platelet monitoring required.

Plenty of food for thought, huh? **Talk to your doctor** about taking #AnyFood with Doptelet.

**Please see Important Safety Information throughout and Brief Summary.**

# READY? TALK TO YOUR DOCTOR!

For most people, keeping a count of 50K platelets per microliter or more can help reduce the risk of bleeding and bruising. You can count on your doctor to help you set goals and reach them, based on your medical history and what you can gain from Doptelet.

## Not sure what your ITP treatment goals are?

Here are a few questions you can ask your doctor today!

Am I on the right treatment to manage my ITP?

Is Doptelet a different option to keep my platelets raised?

How can Doptelet help me lift my platelet count?
