

Doptelet® (avatrombopag) is a thrombopoietin receptor agonist indicated for the treatment of thrombocytopenia in adult patients with chronic liver disease who are scheduled to undergo a procedure or chronic immune thrombocytopenia who have had an insufficient response to a previous treatment.<sup>1</sup>

This resource lists codes that may be useful for identifying appropriate patients for Doptelet. It is important to note that the codes identified on the following pages are examples only. Each provider is responsible for all coding decisions and submitting complete and accurate information to the patient’s insurer. The use of the following codes does not guarantee coverage.
